PROFESSIONAL SUMMARY

Mobile Engineer with a strong CS foundation and hands-on experience in React Native, Expo, and modern mobile tooling, plus backend experience across Node.js and relational and NoSQL databases. Known for building responsive, user-focused applications with clean UI, efficient logic, and real-time features. Most recently served as Lead Software Engineer at Insta-Delivery Systems (ISDS), architecting a live logistics and commerce platform with two apps published to the App Store. Also built and shipped Fitnex, a production PWA now used by 200+ active users. Fast learner, team player, and eager contributor to high-impact, growth-driven teams.

EXPERIENCE

Lead Software Engineer | Insta-Delivery Systems (ISDS) July 2025 – July 2026

Architecting and leading development of a live logistics and commerce platform serving Nigeria and Africa.

- Architected and led development of the full Insta-Delivery ecosystem: B2B platform, B2C marketplace, enterprise admin tools, and Amazon Fulfilment Program module.
- Shipped both the customer and vendor apps to the Apple App Store, including a wallet system supporting funding, peer-to-peer transfers, wallet-based checkout, and vendor earnings tracking.
- Built cross-platform mobile apps (React Native, Expo) and responsive web applications, ensuring a seamless experience across all devices.
- Designed backend systems for multi-location, multi-vendor, and admin-control use cases using Node.js and Supabase (PostgreSQL).
- Contributed to a 20%+ reduction in delivery overhead through platform architecture decisions.

Tech stack: React, React Native, Expo, Node.js, Supabase (PostgreSQL), TypeScript

Mobile Developer | Imagine Integrated Jan 2025 – Jul 2025

- Integrated REST APIs and optimized client-server data handling for cross-platform mobile apps (React Native), ensuring fast, reliable performance.
- Built and maintained cross-platform mobile applications, delivering consistent experiences across Android and iOS.
- Collaborated with designers to implement responsive UIs matching Figma prototypes with pixel-perfect accuracy.

Tech stack: React Native, TypeScript, REST APIs

Frontend & Mobile Engineer | Sabi Programmers Jan 2024 – Dec 2024

sabiprogrammers.com

- Trained and mentored 50+ beginner developers in frontend and mobile development, enabling students to deploy their first responsive apps.
- Co-developed the Sabi E-Voting App, featuring real-time polling and a mobile-responsive interface, leading UI implementation with React and Tailwind CSS.

Tech stack: React, React Native, Node.js, Express, MongoDB, Supabase, Firebase, Sanity

PROJECTS

Insta-Delivery (Customer App) [App Store](#)

Consumer-facing app for a live grocery, food, and logistics platform. Customers browse vetted vendors, place orders, and track deliveries in real time.

- Led end-to-end development and App Store submission of the customer-facing mobile app, built with React Native and Expo.
- Implemented real-time order and delivery tracking via WebSockets, with wallet-based payments built into a smooth, intuitive checkout flow.

Insta-Delivery (Vendor App) [App Store](#)

Merchant-facing counterpart to Insta-Delivery. Vendors receive orders in real time, manage fulfilment, and sync with drivers and customers.

- Built real-time order receipt and fulfilment workflows for merchants, syncing order state with drivers and customers.
- Implemented a native vendor wallet enabling merchants to track earnings from fulfilled orders in real time.

Fitnex: Workout Tracker PWA [Live App](#)

Production PWA used by 200+ lifters to log sessions and track progress. Installable on any device and fully functional offline.

- Built and shipped a production PWA from database schema through UI, now serving 200+ active users.
- Implemented offline-first architecture with service workers and a guest-friendly onboarding flow requiring no signup.

Cartify E-Commerce App [Demo](#) | [GitHub](#)

Full-stack e-commerce platform with real-time CMS, secure auth, and Stripe-powered checkout.

- Integrated Stripe for end-to-end payment processing, including checkout flow and order confirmation.
- Built with Next.js and Tailwind CSS; integrated Sanity.io for content management and Clerk for authentication.
- Implemented product search, category browsing, cart management, and discount-code logic.

SKILLS

Frontend & Mobile: TypeScript · React · Next.js · React Native · Expo · JavaScript · GraphQL · Redux · Tailwind CSS · Framer Motion

Backend: Node.js · Express.js · Supabase (PostgreSQL) · MongoDB · Firebase · REST APIs

Tools: GitHub · Figma · VS Code · Postman

EDUCATION

B.Sc. Computer Science & Education | University of Ilorin 2018 – 2023
